

The Alexandria Gazette

TUESDAY EVENING, OCTOBER 31.

VIRGINIA NEWS.

The tract of 13,000 acres of timbered land on Briery Branch, in Rockingham, was sold on Thursday of last week, to a company of gentlemen from Hagerstown, Md. It was sold for cash; the amount not made known, but is said to have been a good sale. These gentlemen intend starting at once several steam saw-mills to work up the fine timber of that region into lumber. The Bellefonte Woolen Factory property, in Rockingham, has been sold for \$28,000 in currency. This sale includes one-half of the machinery of Bellefonte and numerous other valuables amounting to \$1,000, the other property being valued at \$27,000. Purchasers, Messrs. Frank & Rhodes, both Rockingham men.

National Banks have been established at Alexandria, Charlottesville, Harrisonburg, Lynchburg, Norfolk, Petersburg, Richmond, and Fredericksburg.

We have received the first number of the revived Richmond Enquirer, a large, handsome and well filled sheet, published by Tyler and Coleman. We have also received the Virginia Sentinel published in Warrenton, by Cannon & Dear, a neatly printed paper, and deserving of liberal encouragement.

The editor of the Rockingham Register gives an account of a recent visit through the South eastern portion of Rockingham county, where the late war was fiercest, and says he has no where else seen such unmistakable indications of energy, of active human will, and of determined purpose speedily to wipe out all traces of the war's desolations.

A letter from Dinwiddie county, Va., says there never was known so great an abundance in the woods in that section of country, of wild game—such as partridges, turkeys, deer, squirrels, hares, &c. Every family is largely supplied with game, much to their relief, as there is scarcely any pork in the country.

The proprietor of the Richmond Times asserts that the circulation of his paper is double that of any other paper in the city, and that, under the law, he is entitled to the Post office advertisement, but that it has been taken from him.

All the most influential British journals comment on the nature of the difficulty now existing, with regard to claims the United States upon Great Britain, and some urge that the settlement of the claims in one shape or another is absolutely necessary for the future well-being of England. The London Post, usually regarded as the organ of Lord Palmerston, urges that a conference should assemble to agree upon some common code to be observed by all neutral States.

The Washington Chronicle states that on the first of October the whole bank note currency of the country—State and National—was less by several millions than the amount of State bank notes in circulation on the first of January, 1863.

A family of Shakers from Indiana, have gone on to Lynchburg, to recover possession of a farm near there, which they had sold, but could not get the money for.

Nearer and nearer comes the Cholera. Its appearance on this side of the Atlantic is looked for constantly. Have our people taken the proper precautions? We fear not.

Edward B. Ketchum, whose frauds and forgeries created such a sensation in New York some short time since, appeared before the Court of Sessions, on Saturday, and plead guilty of forgery in the third degree.

The new fifty dollar counterfeit United States note, recently described, is considered by many bank officers as one of the most perfect imitations ever issued. The vignette, which is the head of Hamilton, probably presents the best mark for distinguishing between the genuine and counterfeit.

The Embassy from Tunis was officially received yesterday, in Washington. The President was introduced to the ambassador, who delivered a short address in the language of his nation, to which the President, through the Secretary of State, replied, congratulating the Bey upon acceding so distinguished a statesman, soldier and scholar to this nation, more especially in view of the fact that he was known as the uncompromising enemy of slavery. The reply of the Secretary, which was brief, abounded in sentiments of kindness and good-fellowship, and the President, outside of the official and formal addresses, submitted himself a few remarks, thanking the embassy for the expressions of kind feelings which they had uttered, and more especially for the lively interest which they represent was all the while entertained by their government, pending the late war.

The "radicals" in the Episcopal Convention are said to be much "disgruntled" at their failure to drag politics into the Convention. Their leader is Dr. Vinton, of N. Y.—they are assisted by Bishop Mellvaine, of Ohio, and a few other bishops, and their organ is the Episcopal Recorder. This last named paper is an ultra.

COMMERCIAL.

In New York, yesterday, sales of State flour at \$7.40a\$8.30; Ohio \$8.25a\$12.25; Southern \$9.60a\$16.25; Pork heavy; sales 6,500 bbls. BARTHELOW'S PREPARED PERUVIAN GUANO.

10 per cent. Ammonia. 45 per cent. Phosphates.

Composed of Peruvian Guano and Bone Dust. We manufacture this and claim that it is THE BEST FERTILIZER IN USE.

We pledge our business reputation in it, and guarantee its standard.

We do not sell to dealers—we manufacture only for our own sales. It cannot therefore be adulterated.

WE GUARANTEE IT AGAINST ADULTERATIONS. We offer as reference, on application, the names of many of the leading farmers of Maryland, who have used it for years successfully.

We desire to introduce this fertilizer in the "Old Dominion," and request a trial of its merits. Full particulars given on application.

BONE DUST. Manufactured at our own mill, from bones that have not been boiled or calcined.

Of the advantages of this over Bone Dust, manufactured from boiled or calcined bones, all farmers are acquainted; it therefore needs no comment.

We sell all other fertilizers, but recommend and guarantee only the above.

oc 16—4f

GUANO—REED'S AMONATED SUPERPHOSPHATE OF LIME.—The best superphosphate yet offered to the farmer, possessing all the activity of Peruvian Guano, but being far more durable in its effects.

It contains a large amount of animal matter in a highly concentrated form, which, combined with its soluble bone phosphate of lime, cannot fail to render it very valuable as a fertilizer. Notwithstanding we believe it to be the best super-phosphate in the market, yet, by a process peculiar in its manufacture, whereby the expenses are lessened, we are enabled to sell it very low, with a liberal discount to dealers.
